

Lanka Ride — testing flow

Demo logins for each module. Close, cancel, retire, and refund change the status. They do not delete the database row.

Open **http://localhost:8080** after the app is running against Docker MySQL. Start at **/login**.

Member	Login	Create	Read	Update	Close / cancel	Where
Sakalasooriya Vehicles	fleet fleet123	Add vehicle	Search and open a vehicle. Browsing does not need a login.	Edit it, or transfer it to another branch	Retire	/vehicles /vehicles/new /vehicles/{id}

Ticket list, ticket page, alerts	Staff reply and status	Close the ticket. Retry a failed alert.	/support /admin /support/notifications /forgot-password

Suggested order

1. Log in as `customer` and submit a booking from Find a ride.
2. Log in as `supervisor` and approve it.
3. Log in as `customer` and pay the deposit and rental.
4. Log in as `fleet`, record pickup (fuel FULL), then return with fuel EMPTY.
5. Log in as `operations` and open Monitor. The booking should be flagged.
6. Log in as `finance` and open Payments, then Reports (Print and Download CSV).

7. Log in as `fleet`, add or edit a vehicle, transfer it, and open Maintenance.
8. Log in as `customer` and open a support ticket. Log in as `admin` to reply and to open Alerts.
